

The Immense Factory Organization that makes

# The New Aeolian Hall

"The Best Place to Buy a Piano"

Whatever your musical need; whether you want a Grand or Upright piano for hand-playing only, or a Grand or Upright player-piano for both hand and music-roll playing, you will find at Aeolian Hall the world's recognized standard of its type. And you will be able to purchase this instrument at a LOWER price and on more liberal terms of payment than you can possibly obtain elsewhere.

The eleven great factories of the Aeolian Company, pictured in part above, compose the largest, most modern, most efficiently and economically conducted manufacturing organization in the music-industry.

From these factories during the past decade, have come instruments, which, like the famous Pianola and Pianola Player-piano, have astounded the music-world and revolutionized the piano making industry. In their laboratories have been perfected refinements and improvements in piano building, which have raised the quality of both Grand and Upright pianos to a point never hitherto attained.

Quality is the dominant characteristic of Aeolian Company instruments—a superiority in quality which has made them the recognized standards of the world.

At the same time, so great is the production of the Aeolian Company factory organization, so wide are the economies which this unparalleled production makes possible, that Aeolian instruments represent, dollar for dollar, the highest value to be obtained upon the market today.

These are the facts which make this great, centrally located music establishment, with its beauty and prevailing spirit of courtesy and fair dealing, "the best place to buy a piano."
